

Designed for Portability

The BladderScan® BVI 6100 bladder volume instrument, with VMODE® technology, is a portable 3D ultrasound device that quickly, accurately, and noninvasively measures urinary bladder volume.

Quick and Accurate

measurements of urinary bladder volume and post-void residual (PVR)

Precision Aiming

via lightweight, portable probe

Designed around you

easy to use, distinct design

Handheld Portable Design

The handheld BVI 6100 offers unprecedented portability and versatility in multiple clinical settings.

Sample Display –
BVI 6100

VMODE Technology

In less than 5 seconds, VMODE® technology automatically captures 12 B-Mode slices of the bladder, and displays the calculated volume results. VMODE automated 3D quantification of bladder volume helps clinicians assess bladder function quickly and confidently.

Aiming Assistance

Directional arrows on the probe screen assist the user in ensuring the most accurate measurement is taken.
